

Integration Solutions

Integration Process :

Requirements gathering and planning

- Identify Priority Req/Defects/Enhancements from the product backlog
- Plan & Prioritize deliverables

Integration Development

- Identify Systems
- Create Integration flows, notifications /alerts, quarantine records management
- Build Create Backlog QA Automation scripts

Review

- Deployment to CI/CD Pipeline
- Schedule Test Runs
- Manually initiate test runs

Manual QA & Test Execution

- Deployment to CI/CD Pipelines
- End -End Regression Release
- Schedule Test Runs

Generate Reports

- Test Summary Report

Build & Release

- Feature Set Released for UAT/PROD

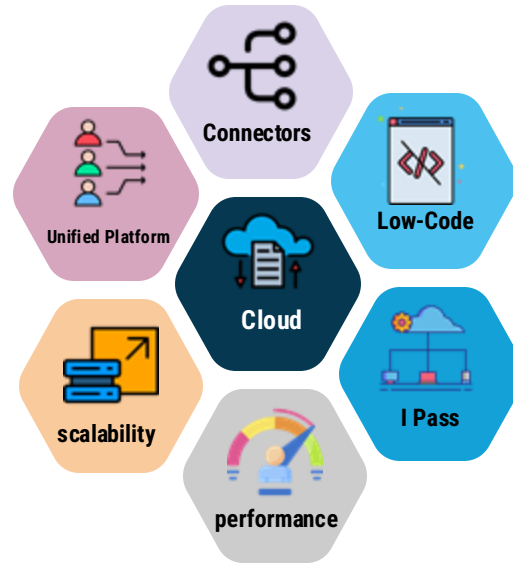

BOOMI :

Pros :

- Cloud-Native Platform
- Low-Code Development
- Wide Range Of Connectors
- Unified Platform
- Scalability
- Performance

Cons :

- Cost
- Customization Limitations
- Dependency on Cloud Infrastructure

APACHE NIFI :

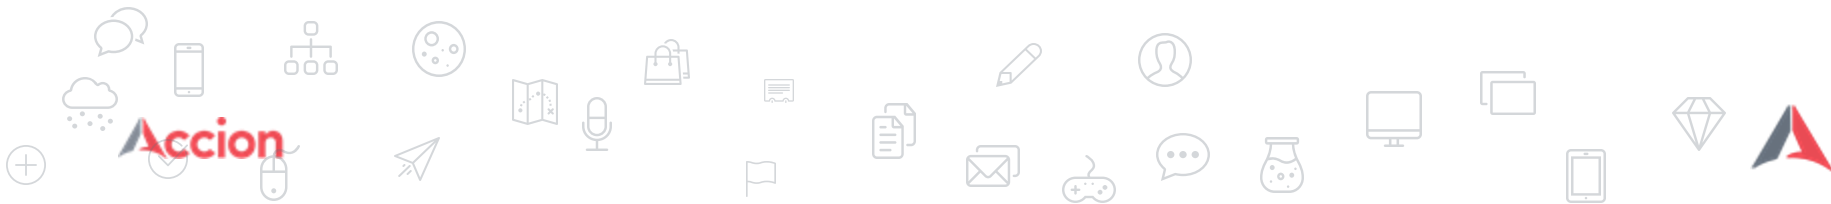

Pros :

- Open source
- Zero cost(Only Infra cost)
- Easy to Use
- Customizable
- Data Security
- Data Provenance
- Real-time Data Processing
- Extensive Community Support

Cons :

- Complex configuration
- Limited documentation

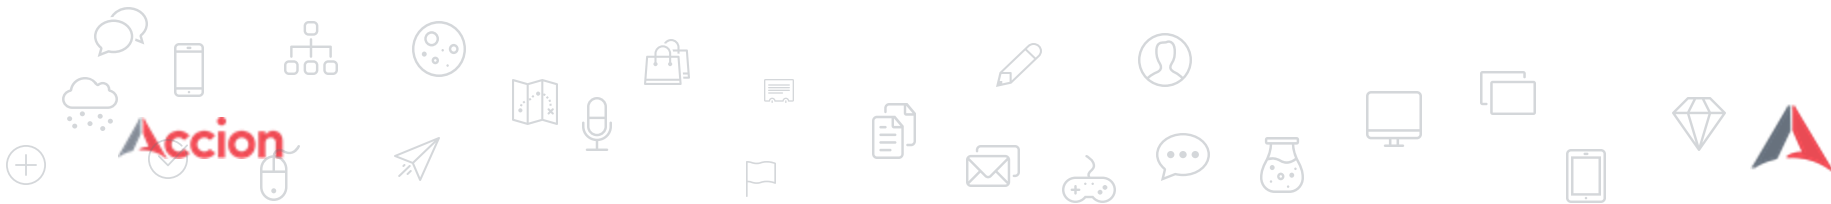

WORKATO :

Pros :

- Ease of Use
- Extensive App Library
- Versatile Integration Capabilities
- Scalability
- Security and Compliance

Cons :

- Cost
- Customization Limitations
- Dependency on Cloud Infrastructure
- Limited Offline Capabilities

Features Comparison :

	Set Up	Cost	Data Privacy and Security	Scalability	Type of Integration Supported
BOOMI	Supports IPAAS model.	Expensive	Supports HIPAA, SOC 1 and 2	Highly scalable	Application , B2B, API Integration
APACHE NIFI	Works on-premise or with any cloud provider	Free	Encrypted at rest and transit	Based on the End User's Infrastructure or can be taken from AWS Marketplace	Data and IOT Integration Customization for other use cases.
WORKATO	SAAS offering and no infra management.	Moderately expensive.	Encrypted at rest	Moderately scalable	Application , B2B, API Integration

Features Comparison ... Continued :

	Connectors	UI	Documentation	Learning Curve	Support	Functionality and Scope
BOOMI	High in number	Great	Good	Moderate	Available	Large scale Organizations
APACHE NIFI	Moderate(Custom Connectors can be written easily)	Moderate	Good	Moderate	Marketplace support	Large scale Organizations
WORKATO	Moderate	Great	Robust	Low	Available	Mid level Organizations

Q and A

Thank You
